## Everglades Fair Starting Mon. To Represent Glades

Fair Chairman Predicts Fair Will Be The Largest Held Here Since The War

With the opening day of the Everglades Fair set Monday plans were going forward this week for the exposition which will have more exhibit frontage than any fair ever held in the Glades. N. B. Willis, fair committee chairman, said.

Scheduled through March 1 at the Legion Hall and surrounding area, the fair, sponsored by Everglades American Legion Post 20, "will be representative of the Glades and an asset to the section," Willis said, predicting that it will continue to grow next year.

The fair will feature local vegetable, produce and other farming industries displays and commercial exhibits. It is the firms showing the latest products.

The fair committee announced that the fair will be open for 2 or 3 p. m. each day during the period if the crowds warrant it. A special children's day matinee will be featured Wednesday afternoon when admission will be free to school-age children, and the price of rides on the midway will be reduced. A special matinee also is scheduled Saturday afternoon. The fair will be open until 11 p. m.

Parking space will be afforded by two lots adjoining the fair grounds, and the Belle Glade Motor parking lot on Ave. E. City officials have designated S. E. 2nd St. one-way during the fair period to alleviate traffic congestion.

Willis said that 27 commercial exhibits and 28 educational displays were scheduled for Wednesday morning and that he was expecting additional exhibits. The indoor exhibits, covering 1,300 front feet of exhibit space, will be housed in the Legion Hall and five exhibit tents. Exhibitors also have reserved space between 200 and 400 front feet of outside space for booths.

A professional decorator from Miami Beach will be on the fair grounds over the weekend to assist in the decoration and construction of booths for \$125 a foot, Willis said.

Included in the educational exhibits will be FFA and 4-H competitive livestock and poultry exhibits, livestock and produce exhibits by Glades communities and individuals; nine school displays, a cooking demonstration booth, Garden Club exhibit, Modern E 21th National Guard Unit, sugar exhibit by the U. S. Sugar Corp., and honey-exhibit by F. C. Markham and possibly a gladiolus display.

**J. F. WOOTEN IS GUEST AT EXCHANGE CLUB MEET**

J. F. Wooten led a round table discussion on banking practices at the weekly meeting of the Exchange Club Feb. 14 in the South Bay Restaurant. W. W. Weeks, program chairman, introduced the guest.

Chairmen of club committees made reports. President E. M. Van Landingham presided.

## C. OF C'S ONE-DAY DRIVE NETS \$2,800

Chamber of Commerce directors announced that memberships obtained in the organization's one-day drive totals \$2,800, which is an incomplete count.

They said they expect the sum to reach \$3,500 in the final count. Anticipated increase this year over last is \$1,500.

Drive team members obtained 65 new memberships which in the complete count will probably bring the total membership to 220, Mrs. George Young, secretary, said.

The chamber of commerce gave a wind-up breakfast for drive workers Tuesday morning at Bell's Restaurant, when Bill Graber, drive chairman, presented W. L. Collins with a cigarette lighter for bringing in the largest number of memberships. Collins obtained 12 new memberships amounting to \$335.

**LIONS HOLD FIRST DIST. CABINET MEETING HERE**

Approximately 33 district governors, deputy district governors, zone chairmen, the international director and wives attended the first Lions District Cabinet meeting to be held here Sunday at the Municipal Country Club. Ross G. Witters, Miami, international director, and Milo Bennett, Miami Beach, district governor of 35, were the principal speakers. Bennett conducted the all day meeting.

Those attending discussed the business of the five Lions Club districts in the state and made plans for the state convention scheduled in Daytona Beach May 25-27 and the international convention set for June 26-29 in Mexico City.

The agenda included golf in the morning, lunch and the business session in the afternoon. R. E. Hotard and Ray Whitlock conducted a tour of the Glades area for the wives during the business meeting. Baskets of Glades vegetables were presented to the guests.

District cabinet meetings, including the area from Vero Beach to Key West and from Moore Haven on the west, are held four times a year.

**ADULT CLASSES GET ENTHUSIASTIC RESPONSE**

An adult typing class, sponsored by the Palm Beach Vocational School meets at night at the Belle Glade High School with Mrs. Raymond H. Webster, instructor.

Mrs. Webster said more people applied for the course than they could register but that they can take advantage of subsequent classes.

## Co. Registration Books To Be Open Here Mon.-Friday

DeWitt Upthegrove Announces Registration Schedule For Glades Communities

In answer to a request made at a special meeting here by the local chamber of commerce and organization heads that county registration books be opened here on an all-year schedule, DeWitt Upthegrove, supervisor of registration, announced that the books will be open here beginning Monday through Friday.

Mrs. George Young, who will be in charge of taking registrations of white persons here, said the books will be open at the chamber of commerce office during regular chamber hours for the period. In the interests of working people, Mrs. Young has volunteered to open the books for one hour between 7:30 and 8:30 on Thursday and Friday nights.

Since a stopping block to a county registration project seems to be the expense which would be involved, Mrs. Young told Upthegrove she would volunteer her services to keep registration open here.

Daisy Murrell and Lottie Hamilton, regular color guard persons Monday and Tuesday at the Carver Memorial Clinic.

Mrs. Young and the two colored clerks have been in the county registration office several days for special instruction regarding registration procedure.

Upthegrove announced the registration schedule for other Glades communities.

South Bay, Wednesday at 7:30 a. m.; Lake Harbor, Thursday at 7:30 a. m.; Lake Supply, Pahokee, Monday through Friday at 7:30 a. m.; Belle Glade Memorial Hospital Sunday following a heart attack.

Born in Mulberry, Florida, Roberts served as a dredge boat operator during the early development of the area. In 1930 he became diesel engineer with the South Florida Conservancy District, which position he held prior to his death.

## Glades Pioneer Dies Here Sunday

Steve A. Gus Roberts, Sr., who came to Belle Glade in 1923 and was active in dredging the main artery canals in the area, died in the Belle Glade Memorial Hospital Sunday following a heart attack.

He was a member of the Belle Glade Masonic Lodge 273 and the First Baptist Church, Glades. Survivors are his wife, Winnie Lee, son, Steve Roberts, Jr., daughter, Mrs. Betty Jane Roberts, mother, Mattie Ridge, sisters, Mrs. Beulah Campbell, Tampa, M. rs. Mollie Parks, St. Petersburg, Mrs. Emma Shepherd, Plant City, Mrs. Marian Grace, Plant City; brothers, Joe, Bartow, Dale, Ridge, Orlando and one grandchild.

Funeral services were held at the First Baptist Church Wednesday, and interment was at the Griffen Memorial Park, West Palm Beach. Rev. Wade H. Griffin officiated.

Active pallbearers were W. C. Adams, H. E. Jones, M. H. Jones, C. W. McDonald, C. E. Maynard and L. E. Will.

Honorary pallbearers: R. O. Plank, W. E. Schlechter, James Ball, Frank Dooley, M. C. Keen, J. W. H. Hocker, W. M. Cunningham, D. C. DeLaven, Cliff Greiner, Walter Greer, A. Kirkman, Paul Kirkman, A. Kirkman, W. P. Risk, Everett Wurts, Charles Boller, Arthur Wells, Luther Jones, Fritz Stein, W. C. Paie, Dick Le Flis and Huber Bore.

**CLAUDE SHIRLEY TO HEAD GLADES RDB DRIVE**

Claude Shirley of Pahokee will head the Community Resources and Development Board drive in the Glades area for which plans have just been completed. G. Bernice Bernell, president, announced this week. Emmett Roberts, city, will be in charge of the drive. The territory of West Palm Beach to the north county line, and Everett Wurts of Lake Worth will be in charge in the district from Lake Worth to the south county line.

The appeal for renewal of old memberships and support from firms and organizations which had not previously been included with the work of the RDB will be conducted by members and directors in each district under the leadership of three vice presidents, he said.

## Absolutely False Says Upthegrove On Registration

We received the following letter and in the interest of fair play, we are printing it as received.

In the last paragraph "con-fused Dewitt" says "Mr. Rardin or any other commissioner had never turned me down on anything in the way of registering voters or making it convenient for them to register."

We're glad you get along with the Commission so well, Dewitt, we know now by your own statement that you and you alone are responsible for the folks not being able to register as they should.

Since you and Paul are so busy, how about asking him permission to allow the people of the Glades the privilege of doing business with the County Offices in keeping with the population of its citizens.

We said that to learn that all that stuff the Rardin folks have been printing about you and the Commission quarreling is just "stupid" is hard for a truthful man to get along, especially when he's mixed up with so many politicians, isn't it, Dewitt?

The Editor, Belle Glade Herald, Belle Glade, Florida. Dear Sir:

I wish to call your attention to an article appearing in your paper on the date of February 1st, 1952.

The said article is headed under the caption "Rardin Vetoes" (Continued on page 4)

## LABOR CAMPS PLACE ROAD SPEED ARRESTERS

To alleviate the traffic hazard in the process and Okeechobee Farm Labor Supply Camps, speed arresters have been placed in the roads about 75 yards apart, Emmett Roberts, director of the Belle Glade Housing Authority, announced.

Purposes of the speed arresters are to slow down traffic on the long open stretches of road in the camps seemed to vibrate high speed and races, particularly by persons living outside of the projects who take advantage of the roads, with no responsibility to the camps," Roberts said.

Requests to reduce speed in the projects have been made periodically at night when there were no guards. Many drivers took advantage of the situation and race around the roads on dangerous lives and property.

"If drivers observe the camps' speed limit, the arresters will not cause damage to their cars," Roberts said.

**EMIL WOLF TO SPEAK ON CORN, BEAN DISEASES**

Emil Wolf, assistant horticulturist, will speak on corn and bean diseases on the Everglades Experiment Station's weekly broadcast, WSWN.

The program is scheduled at 11:15 a. m. Saturday.

**NEW LICENSE DEADLINE SET WEDNESDAY NIGHT**

Deadline for 1952 automobile tags was midnight Wednesday night by order of the Motor Vehicle Commission.

All law enforcement agencies have been instructed to arrest anyone motoring without a valid 1951 license plates. Highway Patrolman J. P. Bartrand reported this week.

## CELESTIAL AND CABBAGE LEAD PRODUCE SHIPMENT

Celery and cabbage still held the lead in produce volume shipments this week.

Rail loadings (on Wednesday to Wednesday night were: Commodities: Ws. Sea. Ws. Sea. Beans 9 337 2 223 Cabbage 11 63 76 412 Celery 44 321 150 1045 Chicory 0 2 2 42 Chichili 0 0 0 15 Collard 0 5 1 6 Endive 0 0 0 0 Escarole 3 19 24 212 Lettuce 0 0 0 0 Mrs. Vegets. 15 114 109 1059 Potatoes 0 0 0 6 Romaine 1 9 3 118 Turnip 0 0 0 0 Greens 0 1 0 2

TOTALS 84 885 367 3207

**LOCAL ELKS TAKE PART IN DIST. TOURNAMENT**

Five local Elks Club golfers—Bill McClatchie, Larry Nash, Clyde Clayton, Jerry McKee and Bill Rhoads—participated in the Elks district tournament at the Ft. Pierce country club course Sunday.

Ft. Pierce placed first in the tournament.

The visitors were entertained at a lunch supper in the evening.

## Black Heart, Red Rot And Subsidence Prevented By Rice Cultural Practices

Rice Growing On Muck Lands As Off Season Conservation And Disease Control Practice

Doc. Allison, Vice Director in Charge of Everglades Experiment Station, and "Trouble" Horard, President of the Chamber of Commerce, gathered the post-graduate degrees to a meeting last Friday night at the Station to evaluate rice growing in the muck lands, and they came up with startling conclusions.

Dr. Simon's original interest in rice growing in the Glades was as a preventative or cure for blackheart and red rot in celery, cabbage and watermelons, and for the control of the results of his tests indicate that the flooding of rice fields does prevent and/or cure those diseases, and Mr. Loring Basal substantiated this from years experience in muck celery growing.

Mr. A. L. Craig, water control engineer at the Station, believes that the prolonged flooding in rice culture reduces the off-season subsidence by three fourths. Mr. F. Greene, whose knowledge of rice culture is in Louisiana began in pre-school years and continued through college and post-graduate degrees to a chosen life's work, has found that the addition of iron to the rice fields, and the arsenic and minor elements contained in the muck, are easily obtainable on the muck.

"Longer heads with more grains per head and of the highest quality long-grain rice are easily obtainable on the muck," Johnson and Turner, "The Texas Rice Boys" who have grown a successful crop of rice in the Glades, said that they came to the Glades because of (1) levelness of land, (2) abundance of fresh water, (3) two crops per year, (4) control of harvest out of season, and (5) increased production and profit.

"Our experience here convinces us that all these advantages make this a 'natural' for rice production in competition with any rice growing area of the U. S."

The discussions ended in a general conclusion that rice growing in the Glades is highly desirable and economically profitable as disease preventative as well as a soil conservation practice.

Further, rice, as a crop offers more attractive returns than any other rice-growing areas.

Rice is a commodity which enjoys a protective price support under the Department of Agriculture's program.

**NORTH CAROLINA FARMERS ENTERTAINED AT DINNER**

The Atlantic Coast Line Railroad entertained 78 North Carolina farmers who were touring this section at a dinner Tuesday night in the Municipal Country Club.

The tour was sponsored by the North Carolina Agricultural Department, the Atlantic Coast Line Development Department and the North Carolina Extension Service. H. L. Spear, assistant county agent, conducted the tour in this area. Mrs. R. W. Lanier and Mrs. George A. Le Gout prepared and served the dinner featuring Glades vegetables.

The tour was scheduled to spend the night at the Clewiston Inn.

## Shootin' Blanks By Paulette

Note to all local motorists: prepare to abandon cars and take to pole vaulting if the city Street Department should start on the road in front of your home.

The under construction fever has the department in grips and numerous streets are in an incomplete condition. But the department is putting more in this category every day.

If you should find yourself in the position of being a resident on a road where the Street Department is eyeing for a pole vault, you might want to take a look at the city Street Department's new road in front of your home.

## News of Glades Boys And Girls In The Service

Force Base and advanced AF training at Scott, Illinois, before transferring to the army.

He is the son of Mr. and Mrs. N. D. Lloyd, Belle Glade.

Pfc. Kenneth T. Edens left Wednesday for Camp Pendleton, California, a Pfc. spending an eight day leave with his parents, Mr. and Mrs. P. B. Edens.

He has been called in a replacement draft for overseas duty with other members of his Division. Since November, 1950, Edens has been stationed with the 2nd Marine Division F.M.P. at Camp Lejeune, North Carolina, where he has served as a store room keeper for a truck company of Motor Transport Bn., 2nd Division. He enlisted with the Air Forces in the summer of 1950 and received his basic training at Fort Rucker, Ala. He is now at Fort Rucker, Ala. He is now at Fort Rucker, Ala.

## DAN MCCARTY TO BEGIN STATE STUMPING TOUR

Dan McCarty, candidate for Governor, will begin his stump tour of the state in Fort Pierce Thursday, February 28, with a major address.

In addition to the crowd expected to gather in front of the Ft. Pierce Community Center, the speech will be heard over a radio station network of over 20 stations.

Prior to the public meeting, McCarty will confer with county and city chairmen discussing campaign activities.

After the night address, McCarty will be held at the Community Center Building where McCarty will greet his supporters.

According to the McCarty Headquarters in Fort Pierce, many of his chairmen will bring delegations from their areas to the night address.

McCarty, an enthusiastic speaker, has been making a tour of the state since he was elected to the U. S. House of Representatives last year.

## WILLIS GIVES FAIR REPORT AT LEGION MEET

N. B. Willis, chairman of the fair committee, made a progress report at a joint meeting of the Everglades Legion post and auxiliary Tuesday night.

He said that 1200 front feet of exhibit space had been secured in the five exhibit tents and the Legion Hall and that between 300 and 400 front feet have been sold for outside exhibits.

A professional decorator from Miami Beach will be available on the fair grounds to decorate booths for \$1.25 a front foot, he said.

W. C. Allen, district executive committee, talked on membership and complimented the fair committee for its progress.

He said that the fair committee had a progress report at a joint meeting of the Everglades Legion post and auxiliary Tuesday night.

## Fla. Power and Light Co. Forecasts \$332,000,000 Expansion Program In Next 10 Years Because Of Demand

Directors of the Florida Power & Light Company were told recently that company engineers estimate they will be called upon to spend \$332,000,000 on plant and system expansion during the next 10 years.

This massive forecast — undoubtedly the biggest ever to be contemplated by any private company in the state's history — will be necessary, the engineers say, to keep pace with Florida's fast growing population.

"Based on Florida's population growth in the past 10 years and a careful analysis of factors that may affect future

growth, it is reasonable to expect that Florida's present 2,771,303 inhabitants will increase to more than 4,000,000 in the next 10 years—that's the sort of thing it looks like we must prepare for," declared Florida Power & Light Company president, McGregor Smith.

As an initial step the company Board of Directors today stamped approval on a \$22,100,000 construction expenditure for 1952 alone. The estimate for 1953 is \$27,800,000, a total of nearly \$500,000,000 for the two years.

The \$332,000,000 outlay fore-

cast by the engineers to cover new generating facilities, distribution lines, warehouses and other expansion, proposes the construction of 10 major generating stations in north and south Florida and on both the east and west coasts.

Eight of them are planned to be larger than any now operating in Florida.

Any one of the five most powerful units—four of 110,000 kilowatt capacity and one a 135,000 kilowatt giant—will be nearly big enough to have met the requirements of Miami or Jacksonville.

Indicating the scope of things to come, Smith said FP&L's largest generating plant at present produces 51,000 kilowatts of electricity.

Florida's spot as the fastest-growing state during the past 20 years and the relatively high standards of its people—which means more demands for power—have become recognized throughout the country, Smith said.

"We have found that Florida's sound and expanding economy is gaining recognition in the state's financial markets where large construction projects such as ours must be financed," the FP&L president commented.

"Furthermore, the attitude of investors toward Florida has been greatly improved due to the encouragement private industry in Florida is receiving from the state's governing officials and law-making bodies," said Smith, who is also Chairman of the state Industrial Development Council.

Smith is an old hand at financing, having successfully marketed over \$100,000,000 of security issues for FP&L since 1944.

The 10 year engineering outlay calls for virtually tripling the company's present electrical output, upping the system of capability of 500,000 kilowatts to 1,495,000 kilowatts.

"Since V-J Day, \$112,000,000 has been spent on FP&L's post-war expansion program," Smith pointed out, "increasing the capability of our system by two and one half times."

Leading off the parade of power, a 75,000 kilowatt addition will be placed in operation this year at Cutler, some 10 miles south of Miami, making it the largest and most powerful electric plant in the state.

Engineering and foundation borings already have been accomplished for another 75,000 kilowatt generator to be added to the Riviera plant, near West Palm Beach, in time for the 1952-53 season, Smith said.

"Our blue print for tomorrow is complete and adequate for defense or war," Smith asserted.

Since power engineers must plan today to meet needs at least three years hence, officials in charge of the forecasting have plotted Florida's prospective future with extreme care.

They see the development of three new "metropolitan areas"—cities of over 50,000 and their surrounding trade territory—during the period: Fort Lauderdale, with about 256,000 permanent residents by 1965; West Palm Beach, with 283,000; and Monroe county (Key West) with 57,000.

Miami metropolitan area should have a population by then of 1,278,000, according to the power company experts.

The Fort Lauderdale area is expected to show the fastest rate of growth, 45.1 per cent. Then, in order, are listed Miami, 37.2; Monroe county, 23.3; West Palm Beach, 22.3; and Jacksonville - Daytona Beach, 15.5.

There are a number of reasons why FP&L will have to triple its power capacity while the population is growing at a slower rate. Company officials explained.

Living standards in Florida already high, are expected to continue rising—more and more time-saving electrical appliances will be used.

Business and commerce expansion with population—air conditioning, high intensity lighting, and the like, will be used to a greater degree.

Consumer markets, increasing with population growth, will attract more manufacturing to produce consumer goods and Smith confidently believes Florida's industrial expansion is destined to rise rapidly.

An interesting sidelight of the company's rapid expansion is that mass production from Indian days, more efficient power plants and the installation of newer and more efficient equipment and devices "will squeeze more kilowatt-hours out of a barrel of oil and effect other operating economies that help hold down the cost of electricity in spite of inflation."

The engineers divided their \$332,000,000 forecast into the following items:

For generating plants, \$108,118,000.

Distribution lines, \$155,732,000.

## Too Late To Classify

Russell Kay

I've heard of one man arsenal but I never met one until the other day when Al Whiddell and Lykes Brothers brought his friend Andy Palmer in for a visit.

Andy is quite a guy; he has an eye as keen as an eagle's and he sports a mess of chin whiskers like they used to wear in the days of Buffalo Bill.

Andy hails from Detroit, is author of "Favorite Tales and the Old West" and other bang-bang-bloody-bloody stories, but his greatest achievement is his gathering of the largest collection of guns in the country.

He started many years ago collecting firearms until he now has over 6,000 individual items that date back as far as the year 1322 and cover just about every type up to the present day.

Many of the pieces in his collection have interesting histories. There's the Adams pistol that killed Long Nose Kate in 1832 at Bisby, Arizona and a Bill that Pecos Bill used to sharpshoot Annie Oakley; a Sharps Buffalo gun once owned by Death Valley Scottie on down to famous guns of more recent days including one carried by the late Al Capone and another by John Dillinger.

The only weapon he has with any Florida history is a Gatling gun that was shipped to General Custer for use against the Indians in the West. Unfortunately, the general did not receive it in time for use in the famed "last stand"; it remained in the fort unopened and later was shipped to the Bangor Hotel in St. Petersburg.

As Andy's collection grew he had to find some place to keep it, so a few years ago he purchased the Old Detroit Arsenal built in 1833, remodeled it and renamed it the Museum of Gun History.

Here his famed collection is on display in especially built racks and cases, and folks from all over the world have visited the inn just to see his amazing gun collection.

The Palmer collection has weapons used in every war this nation has been engaged in and many that were used in earlier wars on the continent of Europe, the Far East and elsewhere.

While he knows the actual history of only a few of the weapons, most of them could probably tell some hair-raising stories if they could talk.

Andy says he sometimes sits and handles an old musket of the type used in the Revolutionary War and wonders what kind of a man carried it, where it was used and what its history really is.

The same applies to those covered wagon era, the Indian Wars and the Civil War.

Andy Palmer has visited Florida on a number of occasions and is now spending the winter here. He hopes some day to bring his famed collection to Florida and establish it in some historic spot as a tourist attraction.

He likes being an inn keeper, does a fine business in Detroit and would probably establish a Military Inn here, too.

He charges no admission to see his exhibit depending on patronage the Inn and his has received to pay expenses. Andy says he can't get another spring to compete with Weekiwahee or Silver Springs, isn't a gambler so couldn't give Cypress Gardens any trouble, but he thinks a lot of folks enjoying visiting his Inn in Florida just as thousands now do in Michigan, and he sure does love the Florida sunshine.

He is always on the lookout for old weapons, especially any with a known history. He would welcome hearing of anyone who has any guns, knives or other ancient weapons dating back to the English, Spanish, French occupation of the state or the early Indian days. He is not interested in the ordinary run of guns and for that reason asks that I do not disclose his address here. But if anyone reading this column has a really historic weapon and would like to sell Andy about it I will be glad to forward a letter and if he is interested he will contact you with a view to purchasing it.

If you like to look at gun collections and ever visit Detroit, make it a point to drop by the Military Inn which is located on Telegraph Road and Warren

Avenue, on U. S. 24, northwest of Greenfield Village. If Andy isn't there his son will make you welcome for he is running the Inn during his father's Florida stay.

## COUNTY PTA STUDIES COUNTY SCHOOL SYSTEM

208 were in attendance at a county-wide study class held in the cafeteria of Central Elementary School, West Palm Beach, where problems dealing with "Know Your School Board" County Schools Better" were discussed.

Mrs. M. D. Worley, County President presided over the meeting, introducing Mr. Howell L. Watkins, Supt. of Schools, and Mr. W. S. Slaton, chairman of the School Board, Ralph Kettler, Vice Chairman—Mrs. Elizabeth Hand and Mrs. Ruth S. Timmons, Board members. Mr. A. C. Howell was absent. Mr. Roy McHenry, chairman of the Board of Trustees was introduced, followed by Jim Neme and Henry Cullen, members. Mrs. Clara Cullen was introduced as Supervisor of Public Instruction.

Mrs. Louella Bowman as Financial Agent, Mrs. George Hopkins as purchasing agent. Mr. Slaton clarified the functions of the different boards by saying that the School Board was the legislative branch, making school policies on county level, subject to state legislation. Mr. Watkins, as Superintendent was the Executive and the responsibility of seeing that the instructions of the school board was adhered to. It was the duty of the Board of Trustees to decide on the qualifications of applicants to the school system and make appointments.

Various members of the School Board, Board of Trustees, Mr. Watkins, and Mrs. Cullen then took turns in answering some 90 questions submitted by PTA members from all over the county. Some of these answers revealed:

"School enrollment for the past several years has increased between 900 and 1000 students each year over the previous year.

"Every dollar made available to the school system is allocated throughout the county on the basis of the most critical situation first. There is no school in Palm Beach County which has not had some improvement made in the last 15 years. Classroom space has priority over the building of auditoriums or cafeterias.

"When plans for new buildings are in the making all departments effected by such plans have a say in their making. Anyone interested in the plans is welcome to talk with the architect while plans are in the making. Plans, however, are subject to state approval and all desired features are not always in the finished building.

"The County Commissioner

provide housing space for the School Superintendent's office, and furnished the present building without cost on the provision that the school system keep the building in good repair.

## CONTINUED EFFORT IS NEEDED FOR PROGRESS ON FARMS IN FUTURE

Although Florida farmers have made good progress in recent years, there's much room for improvement in the future. While recognizing good advances during the past two decades in Florida farming, the Western Extension Service calls attention to some objectives farmers should keep in mind this year and in the future.

There's corn production, for example. During the past decade, Florida farmers have increased their average yield from 10 to 16 bushels per acre. That's a fair progress, but Florida's highest average yield—16 bushels—is considerably below the national average. Planting more acreage to adapted hybrids, using fertilizer more efficiently, and closer spacing will move the state's average upward.

Florida livestock are better than ever, but there's much room for improvement. Many bulls and hogs known to be inferior are still kept in herds and Florida isn't producing as much feed as it should to maintain its cattle and hogs properly. Rigid culling of inferior animals, use of more quality sires, expansion of improved pastures, increased plantings of temp early pastures and increased production of feed, especially for winter are things farmers can do to continue their progress with meat animals.

Large acreages of Florida land are more suitable for trees than anything else. Increased plantings of slash pines, red cedars, and other good trees, proper thinning, and more protection from fire will result in more income from pulpwood and timber for farmers.

More general use of adapted varieties and strains of vegetables and of proven production will result in larger yields of high quality produce.

Through machinery and labor-saving practices, the Flor-

ida farmer today is producing much more than the farmer of 25 years ago, but he should continue to increase his labor efficiency.

Whatever his farming program or success he has obtained thus far, the farmer should keep a close eye on his crop, his work, his results and the results of others, study his operations, and plan as carefully as possible to keep "moving forward." Like many other lines of work, farming either advances or retrogresses—standing still does not remain static. With this in mind, the wise farmer will continually try to improve his program.

La Monte Graw Reappointed Chairman Agricultural Div. President Doyle E. Carlton, president of the Florida State Chamber of Commerce, announced the reappointment of LaMonte Graw, Orlando, as chairman of the Agricultural

Division of his organization, today.

This division is working closely with various farm organizations which have sought its aid in coping with problems arising from the defense effort, over supply and marketing, supply and equipment reductions, farm labor shortages, uncertain transportation, and Cuban and Mexican competition.

### SEINING RESTRICTIONS IN LAKE OKEECHOBEE NOW BEING MAPPED

Restrictions and operational procedures for seine operators who will take part in the controlled seining program recently authorized for six Florida lakes including Lake Okeechobee by the Game and Fresh Water Fish Commission are now being worked out. Preliminary plans developed to the present date include the following:

1. Applications for permits to operate under the controlled seining program for Lakes George, Crescent and Okeechobee will be accepted during a series of public meetings to be held in the lake areas sometime during May, at least 30 days prior to start of operations. At that time, applicants will be required to prove that they have the necessary equipment, technical knowledge and qualifications to operate seines properly and efficiently.
2. Applications for permits to operate seines in Lakes George, Crescent and Okeechobee will be accepted at some time in the near future, although definite dates have not as yet been worked out.
3. Individuals or firms who have been convicted of illegal seining at any time within the past six months will not be eligible for permits.

4. Minimum and maximum length of seines permitted under the program will be 1,000 and 1,600 yards. Minimum length restriction was set because it is felt that it will not be financially practical to assign supervisory Game Commission personnel to seines less than 1,000 yards in length. The maximum length limit of 1,600 yards was set as a practical measure to allow many seining crews to operate as possible.

5. Minimum mesh size for seines will be approximately four inches stretched.

6. Combined maximum length of seines permitted to operate in Lakes George and Crescent at any one time will be 24,000 yards. Combined maximum length of seines permitted to operate in Lake Okeechobee at any one time will be 24,000 yards. The combined yardage allowed in any of the lakes at any one time will be split between all qualified applicants. To clarify this, only 24 1,000-yard seines or 15 1,600-yard seines will be allowed to operate in Lake Okeechobee at any one time. In case there are more applicants than combined yards, seine operators will be required to work on staggered time allotments.

7. There will be no charge for seining permits.

8. No seines will be permitted to operate until approved by Game Commission supervisory personnel.

9. Seine operators will be required to destroy all rough fish (such as garfish, mudfish, shad) taken during any seining operations.

10. All fish taken during any seining operations will be handed through high licensed wholesale fish dealers.

11. Persons or firms holding seining permits will be required to perform a minimum of operations per month, otherwise the permit will be declared invalid.

12. Seining operations in any of all lakes will be slowed or halted when the fish populations are brought into a balance held desirable for sport fishing. It has been pointed out by Commission biologists that the natural balance of fish populations in many Florida fresh waters at the present time is not a desirable one. Manipulation of the fish populations through controlled seining operations, it is felt, will actually improve the present natural balance from the sportsman's viewpoint, much as many modern forestry methods have improved timber and game populations.

13. An integral part of the controlled seining operation will be the continuation of the Game Commission's biological studies of the growth, reproduction, abundance and behavior of the fish populations in Florida fresh waters.

### ROGER W. BARSON DISCUSSES ADVERTISING

This is not a defense of advertising. Probably as much money has been wasted on advertising as on drilling for oil or mining for gold; but getting only dry wells and dead veins! But without those willing to take these wild-cat risks, we would have no oil and no gold. Advertising is a risk and should be sold as such.

But advertising is a good risk. Money spent thereon is the best gamble that I know of. According to an Advertising Bureau which made a study of the 717 companies which were spending annually over \$25,000 on advertising ten years ago, 91% are still in business and doing more advertising than ever, while only 5% are now spending less on advertising. Only one company in twelve found advertising unprofitable.

Those companies which have quit advertising were trying to sell a wrong product, or had wrong sales policies, or an antiquated management. The way this 91% has stayed in business with continuing success, despite competition from new companies and improved products, proves my point.

Most of the above 717 concerns are located in the larger cities; but I believe that statistics of merchants in small cities would show an equal percentage of success. The most successful companies are now giving much advertising to small dealers and weeklies. This tendency is sure to increase as the years go on. The people of small communities read advertisements in newspapers, large or small, especially where there is only one newspaper which controls the field. It is true that the costs of producing all newspapers are rising, but it is easy to raise the price of a newspaper. Most newspapers now sell for five cents, while some have recently increased to seven or ten cents. People want news; the more they pay for a newspaper, the more carefully it is read (news and ads) — hence, more valuable is its advertising space.

I believe in Pensil on Plans; but pensions help wage workers only after they are 65 years old. Advertising helps all employees all the time. Too few companies take seriously the problem of making factory workers understand the importance of what advertising does to hold up production, with high employment. Labor newspapers should not accuse businessmen of "throwing money away" by spending it on advertising. It is true that advertising expenditures were about \$6 billion in 1951, but nearly all of it is closely watched for very prompt results in greater sales, which, when achieved, lead to larger payrolls.

**Better Knowledge Of Government Must Come From Classroom**

A career federal official believes that a better knowledge of government on the part of the nation's citizenship must spring from the classrooms of our educational institutions.

There must be continuing and progressive increase in the participation of government and universities to bring this about, he says.

These beliefs were expressed by Francis P. Brasser, chief of the Administrative Service of the United States Civil Service Commission, who is now at Florida State University in the role of a "visiting lecturer."

His assignment at FSU is to give the students an overall picture of the biggest business theme in the world, namely the Federal Government. He has selected as his central lecture, "Practical Status in Government Management and Operation."

The visiting government official praised the university and Dr. Wilson K. Doyle, FSU Dean of the School of Public Administration, for having recently filled a gap that now exists between government and schools of public administration.

"The Federal Government," he said, "brings the opportunity to welcome to our universities some of the actual illustrations, problems, and case studies which will help to acquaint students with the pitfalls and difficulties encountered in federal administration and management."

He emphasized the need of "better education for management in government," which he says, is only "a must" for our college students, but is also necessary if we are to satisfy the growing need and desire on the part of our citizens for a better knowledge of our government and its work and organization structure.

**"FLYING FARMERS" BOOST PRODUCTION OF FLORIDA CROPS**

Florida farmers are turning the airplane into an important production tool to help them meet the steadily mounting demand for food, feed and fiber.

Each year more than 200,000 acres—or nearly 15 per cent of the state's land under cultivation—are treated by aerial application of insecticides, fungicides and herbicides, according to Freeport Sulphur Company.

Some 350,000,000 pounds of agricultural dusts and sprays—nearly a third of the total production—are distributed over the nation's crops, range and forest lands each year by airplane. It is estimated that approximately 25,000,000 of the country's three hundred million productive acres now receive aerial treatment.

"Over 6,000 'flying farmers' are engaged in the aerial battle against insect pests, weeds and plant diseases," said J. I. Freest, Freeport's agricultural research director. "These pilots are making a real contribution to the defense effort by saving up more and more acreage for crop use," he said. "They perform more than 300 different types of operations, doing the job faster, more efficiently, and in many instances at lower cost than ground distribution."

Sulphur, which is in short supply for the first time since World War I, is a primary ingredient of most agricultural chemicals. Beel pointed out that the shortage has led to efforts to conserve sulphur.

Florida's citrus fruit crop is benefiting greatly from aerial treatment. Chemicals are sprayed by plane to hasten the ripening of certain fruits, to prevent fruit from dropping from the trees too early, to make the buttons stick on lemons during marketing, and to reduce leaf shade in tomato crops and thus hasten ripening.

Among other aerial farming jobs listed by Freeport are the application of pesticides to kill infestations of the corn borer, chemical control of mosquitoes, and reseeded pastures.

**Livestock Sanitary Board To Close Concerns Picking Anthrax Infected Meat**

Meat packers who accept meat from any area infested with anthrax will be shut down, the State Livestock Sanitary Board has decided.

Buttlegging of meat from an infested area in Broward County was reported where a 225 mile area has been quarantined against the disease which kills cattle and can harm humans. Two cases have been reported in Broward County outside the main disease area and one case in Dade County. There is no evidence, however, that the disease is spreading.

**\$588,425,000 INVESTED IN FLORIDA FARMS**

A total of \$588,425,000 is invested in the lands and buildings of Florida's 56,921 farms, groves and ranches.

This value is up 72 per cent

since 1945, the Florida State number of Commerce reports. Virtually half of Florida's 35 million acres is in farm lands of some type, including pastures and woodlands as well as cropland. Details of the State's farms are given in this week's business review of the State's Chamber's research and industrial division. The average size of farms in Florida was 290 acres in 1950, about 75 acres larger than the 1945 average. In 1950 a total of 40,535 of the State's farms were served by electricity and 10,253 had telephones, both approximately double the 1945 figures.

There were 29,277 motor-trucks on farms, 22,033 tractors and 36,123 automobiles reported on Florida farms in 1950.

During 1949 farmers and growers spent \$64,166,614 for hired help; \$31,680,585 for livestock and poultry feed; \$18,308,516 for the purchase of livestock and poultry; \$10,770,602 for gasoline and other fuel; \$8,975,291 for seeds, bulbs, plants and trees; \$7,154,699 for tractor and other machinery repairs; and \$5,899,191 for machine hire.

**LEGAL NOTICE**

**IN THE COUNTY JUDICIAL COURT, PALM BEACH COUNTY, FLORIDA.**

**FILE NO. 100**

**CHALKER LIVINGSTON, Plaintiff, vs. C. C. LIVINGSTON, Defendant.**

**NOTICE TO CREDITORS**

All creditors and all persons having claims or demands against the estate of Chalker Livingston, deceased, also known as C. C. Livingston, and required to file any claims or demands, which they may have against said estate in the office of the County Judge of Palm Beach at West Palm Beach, Florida, within the date of the first publication of this notice. Each claim or demand must be in writing and must state the date of the claimant's death and must be sworn to by the claimant, his executor or attorney, or it will be rejected according to law.

Kathleen Field Livingston, as Executor of the Estate of Chalker Livingston, deceased.

Beck & Allen, Attorneys, Belle Glade, Florida.

Filed: February 8, 1952, 22, 23, 1952.

**LEGAL NOTICE**

Notice is hereby given that the undersigned pursuant to Section 102.05, Florida Statutes, has registered with the Clerk of the Circuit Court of Palm Beach County, Florida, the name of the business known as **FLYING FARMERS** under which name they intend to do business in Belle Glade, Florida, as joint owners.

J. K. Halbrook, Jr. & K. Halbrook.

Filed: February 8, 1952, 22, 23, 1952.

**LEGAL NOTICE**

A Public Hearing will be held on or about Feb. 19, at 10 o'clock a.m. at the Court House, City of Belle Glade, Florida, for the purpose of receiving and considering any objections or suggestions in regard to the proposed annexation of the following described land, to-wit: Part of State Lot 24, being west of the Railroad right-of-way, 125 feet wide, State Lot 24, 125 feet wide, State Lot 25, 125 feet wide, State Lot 26, 125 feet wide, State Lot 27, 125 feet wide, State Lot 28, 125 feet wide, State Lot 29, 125 feet wide, State Lot 30, 125 feet wide, State Lot 31, 125 feet wide, State Lot 32, Everglades Fair

## Home Hardware Store

J. P. and N. N. Hallbrook, Owners  
241 So. Main Phone 2520

We wish to take this opportunity to invite everyone to attend the 1952 EVERGLADES FAIR at the Legion Home and surrounding area February 25th through March 1st.

We promise you school and agricultural exhibits, which will be interesting and educational; commercial exhibits of new products which are beautiful and time-saving; a midway of rides and shows, which will be interesting and entertaining. There will be no gambling or "gyp" concessions.

We are proud of this our first real effort at a fair since World War II. We assure you that with the continued fine cooperation of the merchants, growers and business men of the area, we will put on an annual Everglades Fair which will be bigger and better through the years and which will be a real asset to the Glades.

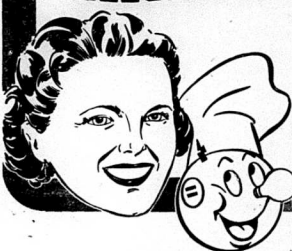

Signed:

Everglades Fair Committee

*Attend the FREE*
